

Evolving with your network.

Over 20 years in connectivity. More ways to support your business.

For more than 20 years, ComponexX has evolved with the technologies our customers use. Our roots in A/V and HFC have grown into a broad portfolio for fiber networks, connectivity and power.

Today, we support FTTH, HFC, small and medium-sized backup power, outside plant and OEM programs, backed by practical product knowledge and personal service.

Fiber to the home

HFC networks

Outside plant

A broader portfolio. One knowledgeable team.

FTTH terminals and enclosures

Access terminals, distribution boxes, splice closures and enclosures for fiber networks and customer connections.

HFC and coaxial networks

Splitters, directional couplers, taps, coaxial connectivity and drop-line surge protection.

Outside plant and supplies

Anchors, poleline hardware, aerial cable support, lashing wire and installation and maintenance supplies.

Fiber connectivity and optics

Drop cables, preconnectorized assemblies, connectors, optical passives and complementary transceivers.

Power and backup solutions

Small and medium-sized backup solutions, including DC backup and AC UPS, plus power distribution and accessories.

OEM and private label

Product configurations, cable assemblies, branding and packaging coordinated around your requirements.

These are examples from a broader portfolio. Tell us what you are looking for—even if it is not shown here.

Personal service. Practical answers.

Knowledgeable people. One point of contact.

Work directly with the ComponexX team to explore product options and coordinate the details. A question, a part number or an installation challenge is enough to start. You do not need a fully defined project to talk with us.

Start with the requirement

Tell us what you are trying to connect, replace or source. We help identify the product family and the details needed to explore a suitable option.

Get clear technical answers

Review interfaces, dimensions, materials and operating requirements. We coordinate product information, drawings, samples and available test documentation for your evaluation.

Explore OEM and private label

Build on established products or discuss changes to connections, cable lengths, enclosures, branding and packaging. Available options depend on the product and program.

Plan the next step together

Clarify configuration, quantities, timing and delivery needs. We coordinate quotations and follow-up, with an agreed specification as the reference for repeat supply.

Our presence

Our team has a presence in the United States, Mexico and China, connecting customer discussions with product and manufacturing coordination.

Tampa
Florida, USA

Houston
Texas, USA

Mexico City
Mexico

Changsha
China

Have a question or a requirement?

Talk with our team. Share what you know so far—a product name, photo, part number or brief description. We will help work through the next step.
