

Coaxial Drop-Line Surge Protection

DLPS SERIES / SOLID-STATE COAXIAL PROTECTION

Help protect subscriber equipment from transient overvoltages on the coax drop. The DLPS family combines solid-state surge suppression with installation formats for different cable routes and grounding arrangements.

DLPS installation formats

Select the installation format

MODEL	FORMAT	APPLICATION
DLPS-15D	Two F-ports on one side	Mounted drop-line protection
DLPS-15DP	F-ports on opposite sides	Alternate routing with the same protection circuitry as DLPS-15D
DLPS-15C	Inline body	Connection to an existing ground block
DLPS-MoCA	Protection with integrated filter	Drop protection and MoCA point-of-entry filtering

Match protection to the network

Select the passband, power-passing requirement and grounding arrangement for the installation. For MoCA-filter applications, match the passband and rejection band to the operator's channel plan.

OEM and recurring supply

ComponexX manufactures the DLPS range. Send your model, specifications, quantities and delivery location to discuss product selection, private labeling and packaging for replacement orders or recurring supply.
